Subject: From my understanding of this settlement and my 25 years in Operating

From my understanding of this settlement and my 25 years in Operating Systems development, during which I have watched Microsoft's increasing aggressive actions with distress as they have used various monopolistic actions as well as other practices that would appear to be illegal on their face (such as disseminating false information). I find I am incredulous at the lack of effect restrictions on Microsoft in the proposed settlement, whom I consider the worst corporate criminal this country in a long time. I only hope that the States involved in this action are able to do the job that needs to be done, which that the US DoJ is would seem incapable of doing.
